

INVITE

WATER LOSS BALKANS FORUM

Constanța, 31st of August – 1st of September 2023

Water loss is a major problem not only for Romania, but for the other balkan countries as well. Sharing the experience and exchanging opinions among water utilities operators will increase efficiency in water supply service management.

Romanian Water Association (R.W.A.), together with RAJA Constanta and Turkish Society for Infrastructure and Trenchless Technologies (TSITT) and in partnership with Constanta County Council and Constanta Municipality Town Hall, organize during the period 31st of August – 1st of September 2023, **WATER LOSS BALKANS FORUM**.

The event will take place at the Constanta Exhibition Pavilion and will bring together professionals in the field of water, representatives of central and local authorities, consultants, contractors, but also representatives of the academic environment.

Thus, we have the honor of inviting you to the Vth edition of **WATER LOSS BALKANS FORUM**, which will take place in Constanta, Romania, during the period 31st of August – 1st of September 2023, your participation having a decisive role in the success of this event.

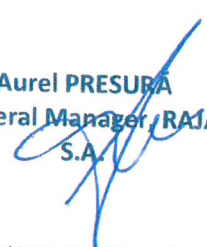

The event is adressed to specialists in the field of water, interested in upgrading technical and managerial performances of the sector, and will contain an international technical-scientific conference, seminars and workshops focused on water loss reduction in supply and transportation networks, good practices regarding networks management, technological loss reduction, etc. Also, a specialized exhibition will be organizes to present equipment and technologies destined to detect, monitor and reduce water losses.

Ilie VLAICU
R.W.A. President

Aurel PRESURĂ
General Manager, RAJA
S.A.

The Romanian Water Association (R.W.A.) represents, promotes and supports the professional interests of its members, mainly of the operators of public water supply and sewerage services and of the specialized companies, in the relations with the public authorities, trade unions and other legal entities, both nationally and internationally. Among the main objectives and forms of activity of the Association are the initiation, development and promotion of strategies and investment programs; supporting the introduction of technical and scientific progress in the field of water, providing technical, managerial advice and international cooperation.

RAJA S.A. is the largest regional public operator in Romania in the field of drinking water supply and wastewater treatment and serves over 2 million consumers in 160 localities.

The Turkish Society for Infrastructure and Trenchless Technologies (TSITT) is the organization that has hosted the Forums on Water Loss in Turkey, starting with year 2014 and has been a partner in previous editions of the Water Loss Balkans Forum, starting with year 2017, having a rich experience in this field.
